

### **Alberta Institute for Wildlife Conservation**

In school and virtual presentation on a variety of topics related to wildlife education

### **Alberta Science Network**

Alberta Science Network provides science curriculum linked outreach to grade K to 9 teachers and their students. Practicing Scientists and Engineers volunteer their time to deliver hands on and interactive presentations in your classroom.

### **Ann and Sandy Cross Conservation Area**

Spend a day in Nature! Offering conservation education programs designed to be experienced outdoors covering engaging and exciting topics with school curriculum ties, either on-site at the Ann & Sandy Cross Conservation Area, or potentially at your own site.

### **Bow Habitat Station**

Offering both curriculum-based school programs and various group programs available to all types of organizations and age groups

### **Calgary Wildlife Rehabilitation Society**

Calgary Wildlife offers wildlife programs to a variety of age groups. Our Wild Wise series is for elementary-aged students and focuses on understanding wild animal behaviour, their adaptations, needs and positive community connections. Book your beaver, skunk, magpie, bat, or porcupine Wild Wise program today! We also have our live-animal ambassador Lito, a Swainson's hawk which can visit classrooms Grade 3 and up, through the *Hawk's on the Move* program. Our Owl program, *The Secret of Silent Flight*, also for Grade 3 and up, can include owl pellets for dissections. Please reach out today to book your Calgary Wildlife education program!

### **Glenbow Ranch Park Foundation**

Immersive, hands-on learning about fish, aquatic habitats, and the environment. A variety of nature-based school fieldtrips including ecology of grasslands, pond field study, archaeology and guided walks.

## **Green Calgary**

Green Calgary offers classroom programs focused on teaching students about the environment and how we, as Calgarians, can make a difference. Their programs cover topics such as landfills and waste sorting, taking care of our water, using worms to compost, and more. They also offer multiple (often free) events throughout the year, and classroom tips on being more environmentally friendly.

## **Inside Education**

Inside Education has a wide variety of no-cost curriculum connected programs from Classroom Visits, Field Trips, Youth Summits, Learning Materials and Teacher Professional Development

## **Nature Kids**

Provides numerous resources to facilitate nature based programming in classrooms, such as "Nature Kids Do it Yourself Activities", "Nature Kids Fun Facts", and introducing students to the diversity of wildlife and wild spaces in our "BIG Alberta Backyard"

## **Trout Unlimited**

Currently offering two programs – Yellow Fish Road and Water Edu-kit - that are aligned with the existing curriculum and provide teachers with presentations, instructions, and actionable steps:
