

Delivering affordable City services helped make Calgary one of the most livable cities in the world*

We're always working to improve City services for Calgarians. Over the next four years, we're making several investments in what matters the most to you, including:

Supporting **Calgary Fire** to improve response times, adding more firefighters and a medical response unit for downtown. Capital investments were also made for four new fire stations in our growing communities.

Investing in **Transit** to improve service and address safety concerns as ridership recovers from the pandemic. To ensure affordability, we've locked in our 2022 fees and rates, enabled kids 12 and under to ride free and lowered weekend family passes.

Advancing Calgary's **Mental Health & Addiction Strategy** by investing in partner programs, services and systems-change initiatives that support Calgarians to be well, get help and stay safe.

* Third most livable city in the world – Economic Intelligence Units
