## REPORT NOTES

Most of the statistical data in this report is derived from the Police Information Management System (PIMS) and compiled by the Centralized Analysis Unit. Using static numbers allows us to compare crime levels at a specific point in time and make an accurate determination of increases or decreases. Unless otherwise stated, previous years' data contained in this report reflect the number of offences reported in the original publication. Although late reporting may occur, and offences may continue to be cleared as time passes, these new events are not taken into account when preparing this statistical report. It is important to note that cases are often cleared months and sometimes years later. Cases "cleared by charge" and those "cleared otherwise" are included in these totals.

# Calgary Crime Statistics - Static Numbers

The static crime numbers in this page are derived from historical Calgary Police Service statistical reports. These statistics are used in order to make a fair comparison using data which has not been allowed to increase due to late reporting of crime. Using static numbers allows us to compare crime levels at a specific point in time and make an accurate determination of increases or decreases.

## 3RD QUARTER 2016

Source: Static Data (PIMS: October 2011 - October 2016)

<sup>1</sup> Selected Non Criminal Code include: accidental/sudden death, missing person, court order, domestic information, and domestic standby.

<sup>2</sup> This number denotes the number of people killed as a result of a traffic collision.

<sup>3</sup> The number of fatal collisions has been adjusted to adhere to Alberta Transportation guidelines governing motor vehicle collisions.

<sup>4</sup> E-collision is a provincial data collection system which became operational in July 2009. At the time of printing of this report, a number of collision reports submitted into this system have yet to be downloaded into the CPS collision system where they can be classified based on severity and where it can be determined if they occurred in a parking lot and are thus excluded from the reportable number. E-collision reports are being downloaded to the CPS system daily which results in fluctuating counts of e-collision reports each quarter.

<sup>5</sup> Total Reportable Collisions exclude collisions along private roadways or public parking lots.

# Disorder Statistics - Calls for Service

The static crime numbers in this page are derived from historical Calgary Police Service statistical reports. These statistics are used in order to make a fair comparison using data which has not been allowed to increase due to late reporting of crime. Using static numbers allows us to compare crime levels at a specific point in time and make an accurate determination of increases or decreases.

In addition to monitoring crime levels, the CPS uses a range of incident types to record levels of "social and physical disorder". The incident types selected for this disorder index are those which can have a negative impact on citizens' quality of life and perception of safety, particularly in public places. These incidents do not tend to be represented well in "traditional" crime statistics which have a propensity to focus more on person and property crime.

Public Generated Disorder Calls for Service  
YTD Jan 01 to Sep 30 2016

**\*Data Note:**

- 1) Dispatched, Advised, Call Back and Web Calls are Included.
- 2) Current Quarter: In addition to the 27,636 public generated calls, officers proactively generated 4,747 calls (these are not included in this report).
- 3) With the introduction of the new CAD system in October 2014, the event types of Juvenile and Prowler expired, however, calls that were previously captured within these event types will likely now be categorized within other disorder event types (e.g. Disturbance, etc.).
- 4) The majority of Property Damage calls result in criminal code reports which are counted under Other Property Crimes in this report.
- 5) 'Graffiti' calls for service are now captured within Property Damage with the introduction of the new CAD system (whereas previously these calls were recorded outside of the CAD system).
